

PALLET SCALES

Loadcell Supplies stocks a range of both trade approved (6/9C/276) and non-trade approved pallet scales.

All pallet's come in a standard size (1200mm x 1200mm). They are manufactured for rugged industrial environments and are fitted with a dust and water resistant protective cover. They are coated either in blue powder or galvanized and come with a R320 basic indicator.

Each scale contains four load cells, and each load cell has 120% safe overload protection. Also supplied is a standard 5m of cable in conduit to the weighing indicator.

The scale has a 240V rechargeable battery.
