

FRONT END LOADER KIT

Loadcell Supplies stocks front end loader weighing kits (note customer to install).

Each kit includes pressure transducer, an electronic digital indicator with mounting bracket and cabling.

The pressure transducer is installed in the hydraulic power line which is connected to either a single ram or T-junction (for 2 rams). The indicator is mounted in a protective but visible spot in the cabin. The pressure transducer is connected directly to the indicator.

All components are of a high quality, economically priced and Australian made.

Capacity	Price
5,000/10,000 PSI	1475 incl GST
